

PROTECT YOUR OFFICE AND YOUR TEAM ALL DAY, EVERY DAY

The New CASPR Mobile reduces harmful viruses and bacteria from the air and surfaces. Using a proprietary catalytic process, CASPR's technology has been proven in laboratory testing to be highly effective at reducing pathogens by more than 99.9%.

CASPR, which stands for Continuous Air & Surface Pathogen Reduction, offers no touch, enhanced disinfection for every surface in your work environment, every minute of the day. CASPR Mobile is not an air filter. It reacts with H₂O molecules in the air to deliver highly effective oxidizing molecules, at safe levels, to all surfaces, removing pathogens that ordinary cleaning methods can miss.

CASPR Mobile can effectively treat a 1,500 sq. foot area. It is not harmful to humans, pets or plants and is completely safe for use in occupied space.

EFFECTIVE AGAINST A MULTITUDE OF VIRUSES

BENEFITS

up to 99.9% kill rate of viruses on surfaces

effective against bacteria, viruses and mold

easy Installation. plug and play operation

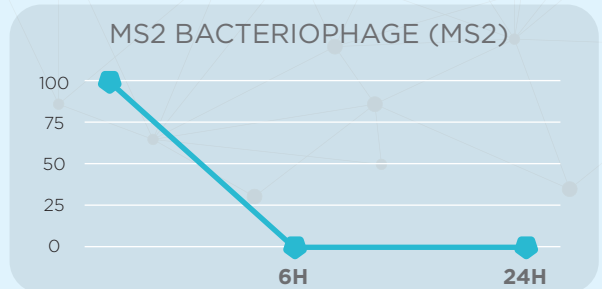

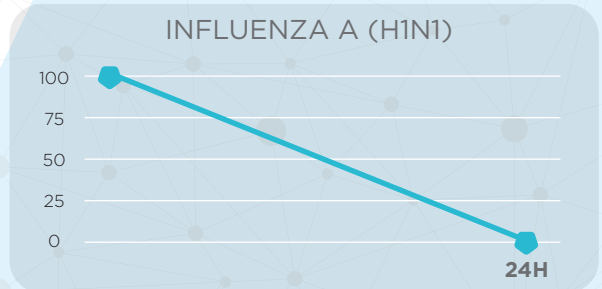

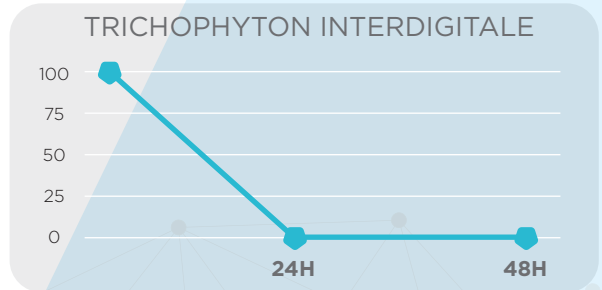

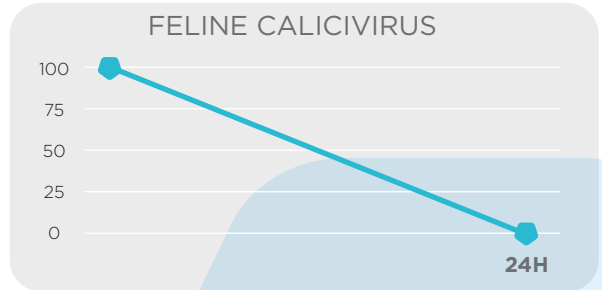

safe, discreet and silent

Although not tested specifically against the novel coronavirus (COVID-19), CASPR Mobile has demonstrated effectiveness against viruses similar to SARS-CoV-2 on hard, nonporous surfaces.

Testing results indicate that CASPR materially reduces or eliminates microorganisms on surfaces in a controlled environment. Results showed Bacteria was reduced over 99.998%, Fungi was reduced over 95%, Methicillin Resistant Staphylococcus (MRSA) was reduced over 99.98%, Influenza A (H1N1) was reduced over 99.93%, and MS2 (virus) was reduced over 99.993%, on surfaces during the testing.

SPECIFICATIONS

electrical	120/220 VAC, 50/60 HZ 70 watts
mechanical	adjustable fan 460 cfm
dimensions	12"H x 12"W x 9"D
weights	10 pounds
max temp	150 F

*

*Testing performed by Microchem Laboratory using ASTM E1153 Testing Methods

**These products are not intended to diagnose, treat, or cure any disease.
