

2CLEAR SYSTEM

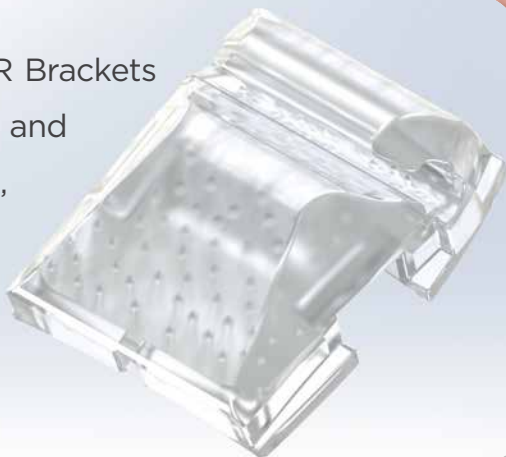

SMART. AESTHETIC. ORTHODONTICS.

WHEN IT COMES TO
YOUR SMILE, **2** IS
SOMETIMES **2** IS
BETTER THAN **1**

Introducing the 2CLEAR™ SYSTEM

an innovative two-phase approach
to orthodontic treatment for both
adolescents and adults that
combines the efficiency of
regular braces with the
aesthetics of aligners.

Because 2CLEAR Brackets
are ultra-smooth and
only 1.3mm thick,
you will barely
feel them.

HERE IS HOW THE 2CLEAR™ SYSTEM WORKS

During Phase I of treatment, 2CLEAR™ Brackets, the thinnest, most transparent brackets in the world, are used along with a very thin wire to facilitate major tooth movement. They move your teeth fast!

During Phase II of treatment, you'll wear 2CLEAR™ Aligners to move your teeth to their final position. The aligners sit on top of your 2CLEAR Brackets, providing additional control and making your aligner treatment as efficient as possible.

Why try the 2CLEAR System?

CAN TREAT MOST PATIENTS

COMFORTABLE

PROVEN

FAST

NEARLY INVISIBLE
